

Bamboo 2021

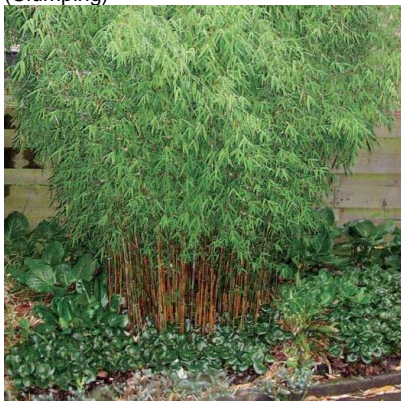

Fargesia robusta Himalayan Mountain Bamboo

Clumping, Zone 6 Min. -20°C/0° F, Sun – Shade, 15', Culm Dia: 3/4". This tight clumping Mtn. bamboo has a unique characteristic for *Fargesia* in that it is almost totally erect. Similar dainty light airy foliage reminiscent of that seen in many Japanese paintings. This *Fargesia* is the fastest growing of the *Fargesia*'s moving out 4" wide per year.
5 gallon , 5'-6' tall , \$ 85.00ea
7 Gallon, 7-9'tall, \$ 125.00ea

Fargesia rufa, Dwarf Mtn Bamboo
 Zone5-9, Clumping, Shade-Sun,Ht:8", Culm 1/4" Small fast growing tight dwarf bamboo. Can be pruned to 2'. Maroon colour canes. Excellent for small gardens.
5 Gallon, 3-5'tall,
\$ 45.00ea BEST PRICE!

Fargesia sp. 'Scabrida'
 Zone 6 - 9, Height: 12-14 feet, Dia: 0.5 to .75 inches, Hardiness: -20C (-5° F), Non-running (Clumping)

This elegant bamboo was collected in 1997 from the mountains of Pingwu county in Sichuan, China at an elevation over 8,500 feet.

Scabrida' has perhaps the most exciting colors of any hardy clumping bamboo: the young culms have dark orange sheaths, opening gradually to reveal steel-blue and lavender culms, aging to an olive green. The leaves are dark green and slender, with a graceful, airy arrangement. Non-invasive and tight clumping growth habit.
5 Gallon, 3-6'tall, \$ 65.00ea

Phyllostachys bambusoides Japanese Timber Bamboo

(above,my bamboo 2006 back yard grove)
 Zone 7, Sun – Shade, 35' – 55'. Straight tall strong culms create an open bamboo forest. Used mainly for construction and edible shoots. Branches open high up on the culms. It takes about 7 to 9 years to make a nice open forest. The Largest plant in Canada seen growing in West Vancouver B.C. 55' tall and almost 5" diameter culms. Most Popular Timber Variety!

15 to 50 gallon pots
\$ 120.00 single to 1000.00 multi cane
mature 3" dia cane clumps

Phyllostachys nigra Black Bamboo

Running, Zone (5)6 Min -23 °C, Sun - Part Shade, 20' – 30', Culm Dia. 1½" - 2". If you can only have one Bamboo, this is the one to own. A very popular ornamental type, its beautiful glossy black canes grow to full size in our west coast climate. It requires moisture at its roots and as the grove matures, the culms develop leaves and branches at the 5' level. The black canes are revealed at this stage. This variety is excellent when grown in a container.
5 gallon \$87.00,
7 gallon 120.00

Winter Bamboo *Phyllostachys bissetii*

Running, Min. Temp. -24 °C, Zone 6, Sun – Part Shade, 15' – 25' (pruned 8'+), Culm dia. ¾" – 1 1/4". Thick dense groves create a perfect screen. The top gently bends over to create a mushroom appearance from a distance. Highly prized for fresh, bright green leaves throughout the winter. Very cold tolerant.
5 gallon \$85.00

Phyllostachys vivax aureaculmis Yellow Chinese Timber

Running, Zone 6 Min. -20°C, Sun, 35'-75', Culm dia: 4". New to cultivation. This is a most striking colour, fast growing and hardy timber bamboo. Giant 4" diameter yellow culms have multiple green banding.
5star RARE.
